

# Interactive Reading & Notetaking

www.IRNCorp.com

## 2017 SUMMER TRAINING SESSIONS!

INTERACTIVE READING & NOTETAKING is a **POWERFUL PROCESS** that shows students *how to learn!* What happens when you combine, align, and apply research, strategies, standards, content, and assessment? Teaching AND learning become more effective, efficient, and *easier!*

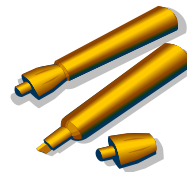

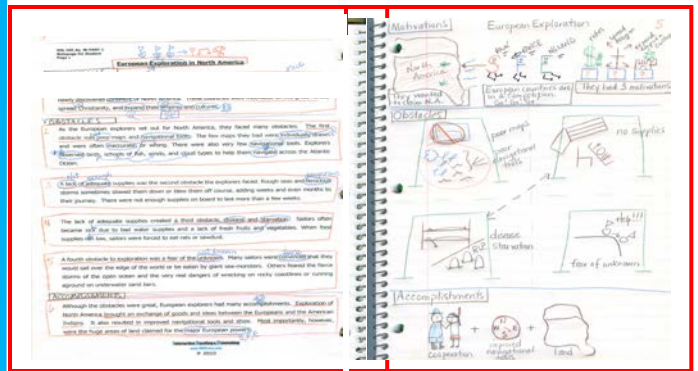

The creators behind **INTERACTIVE READING & NOTETAKING** used their own experiences as teacher, reading specialist, instructional specialist, administrator, teacher as researcher, and curriculum writer and relied heavily on student input and outcomes. **After all, our mission is to revolutionize teaching AND learning!**

Come see *how* Cambourne's Model of Learning, Marzano's instructional strategies, the best reading strategies, brain research, and a whole lot of metacognition are on **every single page of the interactive notebook you'll create as a model** to use in your classroom. Try out the process for yourself and see *why* it becomes a **mindset** for great teaching AND great learning! *Join us!*

### Your choice of Trainings at [Rappahannock Community College's Regional Educational Consortium!](#)
